

COSAPOTS

DESIGNED FOR IMPACT

Catalog 2026

Designed for impact

Inspiration is everywhere. On every corner. In every street. Shapes. Materials. Patterns. Our architects used this inspiration to design our unique collection.

Cosapots are strong, lightweight and available in exceptionally large sizes, perfect for both indoor and outdoor spaces.

COSAPOTS
DESIGNED FOR IMPACT

Built to last!

All Cosapots are constructed by highly skilled craftsmen and are made from the best polyesters combined with high-quality fiberglass. Each piece takes 3 to 7 days to finish and is 100% handmade.

The design
explained

Premium appearance

A high, solid inner rim conceals the interior framework, allowing it to remain visible and contribute to a high-end appearance.

Frost resistant & impermeable

Made from Cohesa, the best quality fiberglass combined with polyester and natural additives.

Waterproof

Completely sealed with a watertight layer on the inside of the pot. Holes can be drilled in the bottom for outdoor use, allowing for proper drainage.

Structural reinforcement

Every Cosapots planter has built-in structural reinforcements to improve durability, ensuring superior strength even in demanding environments.

Hand-finished texture

The lightweight material allows for easy mobility but has the look of heavy stone.

Easy to re-pot

The unique, thin rim maximizes space and indicates the maximum filling height, while also lowering the center of gravity to enhance stability.

Unique strength

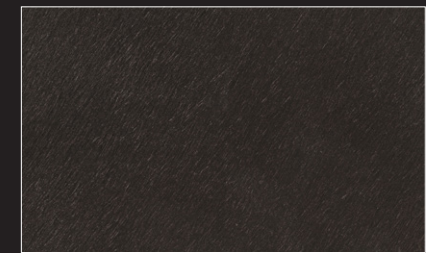

A solid inner rim, additional reinforcements, and up to 7 layers of resin and fiberglass give Cosapots planters superior strength.

Timeless colors

Cosapots' natural, stone-like look is achieved by mixing carefully-selected, high-quality materials with natural colorants.

From afar

Up close

How to plant?

1. When used outdoors, drill holes every 12 inches of planter space in the bottom of the pot to allow for sufficient drainage. Use a 1-inch drill bit. The excess water will flow away along the raised bottom.
2. Add a layer of porous substrate of minimum 10% of the pot's height. Consult a plant expert for optimal watering management for your planter's size and your plant's specific needs.
3. Select the right soil for your plant and fill the pot. The bottom of the inner rim indicates the maximum filling height for an aesthetic result.
4. Cover the soil with wood chips or similar decorative toppings to prevent weeds from spreading and wet soil from splashing up.

Cleaning & maintenance

Cosapots offers a cleaning kit that removes even the most persistent stains. Spray the product on the surface to be treated, let soak for 2-5 minutes, then remove stains or dirt with a sponge or soft scrubbing brush. Rinse with water.

New

Amo

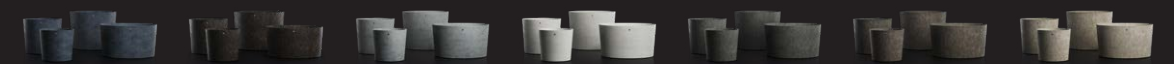

The Amo collection shows how simple geometry can be truly beautiful. With a gently tapered silhouette, it feels both elegant and timeless. Each shape stands out on its own yet pairs effortlessly with others, creating rhythm and balance in any arrangement. Whether displayed as a duo, trio, or quartet, Amo brings harmony and sophistication to any space.

Juno

Inspired by Roman mythology's Queen of the Gods, the Juno planter combines strength with elegance. Its signature rim detail echoes across the Cosapots collection, symbolizing durability and purity. With a shape rooted in timeless simplicity, Juno is crafted to provide stability and refinement for the world's most beautiful indoor and outdoor plants.

Semplito

A refined counterpart to the Semplo planter, Semplito offers a slightly smaller and more elegant form. Its proportions make it easy to arrange and ideal for creating well-composed spaces. Like the Semplo and members of the Reglo family, Semplito works beautifully in combination, delivering a clean and modern aesthetic.

Lonno

The longest planter in the Cosapots collection, Lonno makes a bold statement with its expansive rectangular form. Its generous length can define a space or transform a room with just two pieces. Despite its size, Lonno retains the clean lines and timeless design that define the Cosapots identity.
