

Lofto fitted with internal shelving, as seen from above

Optional internal shelving

for the Lofto series

Eliminates base build-up

Raises your grow pot closer to the rim without foam or upturned pots underneath.

Fits through the opening

Two half-round pieces rest on notches built into the planter wall.

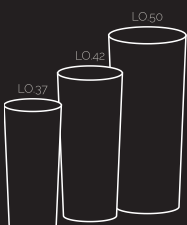

Built-in drainage

Allows water to pass through when used outdoors.

Made for grow pots

Set directly on the shelf outdoors or in a sealed liner indoors.

Planter SKU	Size (inches)	Max grow pot	Shelf SKU
LO.37	Ø 14.6 x H 30.5	10in	LO.37.B
LO.42	Ø 16.5 x H 36.4	12in	LO.42.B
LO.50	Ø 19.7 x H 43.7	14in	LO.50.B

COSAPOTS

Shelf installation for Lofto

Before you begin

Optional

Weigh down the base of the planter with drainage-friendly material like rocks or bricks for extra stability before fitting the shelf.

1

Lower the first piece in on its side, then lay it flat on the notches.

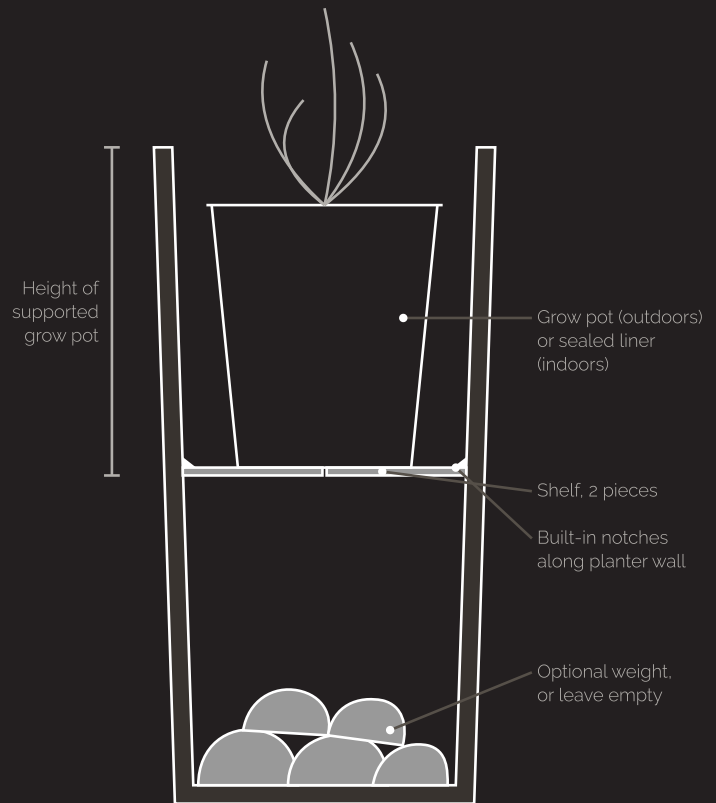

2

Repeat with the second piece. The straight edges meet in the middle.

3

For outdoor use, place the grow pot directly on the shelf. For indoor use, contain the grow pot in a sealed liner.

Four notches inside the Lofto wall are built-in supports for internal shelving.

Both shelf pieces contain a drainage hole, ready for outdoor use.

Once in place, a close fit provides additional stability and prevents the shelf from shifting.
